**CONTROL MODULE ANNOUNCES COMMITMENT TO DELIVER WORKFORCE
MANAGEMENT TECHNOLOGY TO LATIN AMERICAN MARKET**

Company Showcases Its Biometrics Technology At CIAB Trade Show In Sao Paolo; Aligns
With Global e-Secure To Handle Distribution

ENFIELD, CT, June 15, 2005 – Control Module Inc. (CMI), the leading workforce management technology provider, today announced its commitment to deliver a complete line of access control and data collection terminals to the Latin American market. Control Module's workforce management terminals enable the secure automation of time & attendance and access control. These terminals support a broad selection of input reader and communications options. The integrated biometric readers use the best available biometric technology for user identification or verification against user credentials.

Control Module will showcase a complete line of products at the CIAB trade show, which is the largest IT technology conference for the financial segment in Latin America. The company will demonstrate its BioScan Express[®], TouchTime[™] and Genus[®] lines of biometric terminals.

Control Module also announced a relationship with Global e-Secure, the leading provider of security event management and biometric solutions in Latin America, to provide the company its complete portfolio of products, including its biometric terminals, for resale in Latin America.

Control Module's biometric technology enables companies to tie personnel data directly into payroll, scheduling, and time & attendance management systems, creating a secure employee environment, more efficient workforce and more accurate payroll expenses. Additionally, the company's BioScan Express terminal is the first biometric offering that is accessible and affordable for businesses of all sizes, in any industry.

“Control Module is extremely optimistic about the growth of the Latin American markets and enthusiastic about the relationship we have formed with Global e-Secure to deliver solutions, including our technology, into these markets,” said Jana Moak, President & CEO, Control Module. “We are particularly proud of our collaboration with Global e-Secure because of our shared objective to deliver customers the best possible technology solutions with a strong focus on customer service.”

“Latin American companies are clamoring for quality workforce management solutions that deliver a clear return on investment through improved attendance and payroll accuracy, workforce schedule optimization, and improved security with biometric physical access control,” said Felice Foglietti, President, Global e-Secure. “Global e-Secure will offer total solutions to customers, including advanced workforce management software and Control Module’s leading-edge technology. Global e-Secure, together with Control Module, will continue to deliver the Latin American markets with the most accurate and reliable security technology possible.”

ABOUT CONTROL MODULE
