CONTROL MODULE AND GHG TEAM UP TO DELIVER CUSTOMERS COMPLETE WORKFORCE MANAGEMENT SYSTEMS

GHG To Act As Master Reseller, Combining its Automated Time & Attendance Software with Entire Suite of Control Module's Premier Workforce Management Terminals

ENFIELD, CT, May 3, 2005 – Control Module and GHG, two leading providers of workforce management and time & attendance technology, today announced a partnership to provide GHG customers with one-stop shopping for all their workforce management needs. By combining Control Module's hardware, including its BioScan Express[®], Genus[™], SaveTime[®], EasyTime[™] and TouchTime[™] terminals; with GHG's software, the company will have the ability to provide comprehensive, valuable solutions to its federal, municipal and private sector customers.

Control Module has developed advanced and easy-to-use workforce management terminals using sophisticated technology, including biometrics and Java-enabled devices. Combined with GHG's software, which offers a variety of cost-effective, user-friendly features, companies will have a range of options to meet all of their time & attendance, payroll and employee self-service needs.

"CMI is proud to work with GHG to bring our workforce management terminals to life in the federal and municipal markets, which is an area we have targeted for growth," said Jana Moak, President & CEO, Control Module. "GHG's strength in these industries, as well its position in commercial and industrial markets; and its strong commitment to delivering the highest quality software for its customers, makes this a particularly exciting opportunity for Control Module."

"Both GHG and Control Module are focused on delivering our clients the best possible time & attendance technology, with a commitment to unsurpassed customer service," said John Denny, General Manager, GHG. "The depth and quality of Control Module's workforce management terminals, as well as our companies' complimentary products and analogous business philosophies, make this partnership a great match for GHG."
