**CONTROL MODULE AND UNITIME SYSTEMS COMBINE FORCES TO DELIVER
CUSTOMERS SOPHISTICATED AND SEAMLESS
WORKFORCE MANAGEMENT SOLUTIONS**

Unitime Systems To Act As Master Reseller, Providing Its Time & Attendance Software
With Control Module's Complete Line Of Workforce Management Terminals

ENFIELD, CT, October 19, 2005 – Control Module and Unitime Systems, two leading workforce management and time & attendance technology providers, today announced an agreement to provide customers complete solutions to meet their needs. The companies will combine Control Module's entire suite of biometric workforce management terminals with Unitime Systems' sophisticated time & attendance software to deliver comprehensive offerings and effective time & attendance solutions.

Unitime Systems will implement Control Module's comprehensive set of workforce management terminals, including its Genus I, Genus II, Genus PC, TouchTime, BioScan Express and BioTime terminals, as it builds solutions that easily integrate with payroll, human resource management systems, and other frontline labor management business functions.

"Partnering with Unitime Systems provides Control Module broader reach as we continue to implement our growth strategy," said Jana Moak, CEO, Control Module. "Given the skill and experience of the Unitime Systems team, we also feel confident that our terminals will provide the company with a broad range of solutions; therefore, fulfilling Control Module's pledge to deliver unparalleled customer satisfaction and a measurable return-on-investment."

"Partnering with Control Module was a natural evolution for Unitime Systems, as we continue to implement superior technology into our best-of-breed time and attendance solutions," said Doug Peterman, CEO, Unitime Systems. "Control Module has invested significant resources to provide sophisticated biometric terminals and a comprehensive product portfolio to meet a variety of customer needs. Unitime Systems fully intends to leverage that investment to deliver the best technology for our customers."

About Unitime Systems

A leading provider of labor management and time automation solutions, Unitime Systems has helped over 2,000 small to enterprise organizations in over 7,500 locations enhance the performance of employees, managers, and overall operations. For over 12 years, Unitime Systems has provided simple and logical solutions that maximize workforce activities, improve automation, and streamline processes to help businesses achieve their goals. To date, Unitime Systems products are responsible for accurately calculating time for over 20 million paychecks annually.

About Control Module
